International Peanut Market:

USA: South Georgia peanut farmers concerned by heavy rains. Only 65 percent of the 2018 Georgia peanut crop has been planted. The forecast of more heavy rain on young, already seeded plants, has farmers concerned. Some growers are now out to seize and if they can finish planting, mostly at least another one week.

Argentina: Positive news weather is settling down to allow proper harvesting. Negative point is that after the rainy period of at least 20 days on the duged 70 percent of the crop, farmers and shippers are realizing now the quality issues.

China: The price of the imported peanut kernel is charged according to the domestic price. Now the arrival quantity of the imported peanut kernel tends to be reduced, mostly it is the oily peanut kernel from Senegal. For other countries, because their prices is higher. The domestic market can’t accept it. The arrival quantity is less. The close price of the oily peanut from Senegal in Pingxiang and Dongxing port of Guangxi Province is at about 5,500 to 5,700 RMB. What does the tide could bring?....
